Types of Questions Included on the TSAT

There are three questions asked about each service included on the TSAT:

1. **Availability** refers to whether or not you know a particular service to be available in your school. This question is recorded as either “Yes” or “No”.

2. **Accessibility** refers to your best estimate of the percentage of all students with disabilities in your school who participate, receive, or engage in a particular service during their time in your school. Students with disabilities include all students in your school who are on an IEP or 504 plan. This question type can be answered on a five-point continuum between 0-100%.

3. **Coordination** refers your best estimate of the total percentage of time that a service is delivered in coordination with Vocational Rehabilitation. For example, if a career related guest speaker comes to talk with students five times a year, you will indicate your best estimate of the percentage of time that this activity is coordinated in partnership with Vocational Rehabilitation (on a five-point continuum between 0-100%). It is not uncommon for this percentage to be zero.

Please think broadly about the services that are offered to students in your school, not just the services you provide to students on your caseload.
